Interactive post-graduate course

on

# Characterization, management and exploitation of genomic diversity in animals

---

Wageningen University & Research organizes a 5-day interactive course from 15 to 19 October 2018, in the framework of the EU Horizon 2020 project IMAGE (Innovative Management of Animal Genetic Resources).

## Content of the course at a glance

- Measures of genomic diversity
- Diversity across breeds
- Adaptive introgression
- Functional genomics
- Management of small populations
- Prioritization for conservation
- Optimal contributions
- Setting up gene bank collections

## Lecturers

- Jack Windig, Wageningen University & Research (the Netherlands)
- Gabor Meszaros, University of Natural Resources and Life Sciences (Austria)
- Hendrik Jan Megens, Wageningen University & Research (the Netherlands)
- Steffen Weigend, Friedrich Loeffler Institute (Germany)
- Michele Tixier-Boichard, French National Institute for Agricultural Research (France)
- Mirte Bosse, Wageningen University & Research (the Netherlands)
